# AACER™

RESIDENTIAL FLOORING

From the forests of northern Wisconsin and Michigan, where rich soil, cold winters and short growing seasons combine to create the perfect atmosphere for producing hardwoods of unrivaled excellence and beauty, Aacer brings you a full line of northern hardwood flooring products in a variety of species, widths and grades. Unparalleled quality, rich consistent color and exceptionally tight grain make northern hardwoods the premier choice in wood flooring among architects, home builders and general contractors. Choose from our PreFinished, Cafe, and Unfinished solid wood flooring Collections. Enjoy a great wood selection, from hard maple and northern red oak to cherry, yellow birch, beech, ash, white oak, red birch, and hickory.

All wood is milled and graded to a high standard at our 300,000 square foot state-of-the-art manufacturing facility in Peshtigo, WI. Our process allows us to consistently deliver quality products that are durable, longer in length and beautiful. These qualities contribute to easy installation and less material waste in the field.

*Aacer has developed techniques to recreate a vintage appearance. Our methods fine-tune the coloring and finishing of panels to simulate the passage of time through true craftsman like hand scraping, resulting in large knotted boards with an aged appearance. Some of these characteristics will change over time.*
